PREFACE.

Another volume is herewith added to the countless tomes before the world. There is no harm in book-making, provided good books are made. The goodness of this book is acknowledged by some, questioned by some, and flatly denied by others. It is not, therefore, noncommittal, but goes before the world its own frank and independent expositor. Let no one be afraid of this book;—if it contain Truth, the reader will rejoice in it—if it contain error, reason will expose it.
